Front-End Development Course

About Me

I am a passionate Front-End Developer focused on creating clean, modern, and interactive UIs. I enjoy transforming ideas and designs into functional and visually appealing digital environments using React, Next.JS, TypeScript, and CSS/SCSS/TailwindCSS. I always pay attention to UI/UX, accessibility, component structure, and writing code that is easy to understand and read. For me, a problem-solving mentality is a top priority, I am not afraid to make mistakes, constantly improve, and learn new things. My goal has always been and will be to create and develop a quality product.

Experience

2025 Dec. – Present
ROWIX

Front-End Developer (Full-time)

Developed and maintained interactive front-end interfaces for ROWIX using React, TypeScript, and Next.js. Built reusable component systems, integrated external libraries, and implemented responsive, animation-rich UI. Collaborated within a team to deliver scalable features while ensuring performance, maintainability, and smooth user experience.

2024 - Present
GarGari

Co-Founder & Front-End Developer

Co-founded GarGari and led front-end development across company projects, building responsive interfaces, implementing modern UI/UX patterns, and optimizing performance.

2024 - 2025
Zmna.ge

Front-End Developer

Developed the full front-end of Zmna.ge, a modern Georgian news platform. Built responsive UI, implemented dynamic category pages, optimized rendering, integrated ads, and maintained overall site performance and user experience.

2023 - Present
Freelance

Front-End Developer

Developed modern web applications and websites for clients using React, Next.js, and responsive UI design. Built production websites including **Reagent.ge**, implementing responsive layouts, reusable components, and performance-optimized pages.

2024
LeverX

Front-End Development Course

Completed an intensive practical training focused on HTML, CSS, JavaScript, TypeScript, React, GitLab, Webpack, JSON-Server, and real-world application development.

Education

Georgian-American University

Bachelor of CS and Engineering

2022 - Present (2026 Graduation)

LeverX

Front-End Development Course

Nov 2024 - Dec 2024
