## About Me

I am a passionate Front-End Developer focused on creating clean, modern, and interactive UIs. I enjoy transforming ideas and designs into functional and visually appealing digital environments using React, Next.JS, React Native, TypeScript, and CSS/SCSS/TailwindCSS. I always pay attention to UI/UX, accessibility, component structure, and writing code that is easy to understand and read. For me, a problem-solving mentality is a top priority, I am not afraid to make mistakes, constantly improve, and learn new things. My goal has always been and will be to create and develop a quality product.

## Experience

2026 - Present
TypeSprint

### React Native Developer

Developed and launched "**TypeSprint**", a mobile typing practice application focused on improving typing speed and accuracy. Designed and implemented a clean, performance-oriented UI, integrated authorization, global leaderboard, real-time WPM and accuracy tracking, and built a gamified experience with badges, personal best records, and statistics history. Achieved strong market traction, reaching **#2** on the App Store in Georgia at its peak ranking.

2026 - Present
Remy

### React Native Developer

Currently working on "**Remy**", a personal finance mobile application for tracking recurring payments and subscriptions. Designed and implemented an intuitive UI with real-time payment status tracking, automatic due date cycling, and smart overdue detection logic. Built features including per-payment reminders, priority flagging, category organization, and a monthly overview dashboard. Engineered a custom recurrence engine that handles payment lifecycle across months. automatically resetting cycles, detecting newly added payments to avoid false overdue states, and advancing due dates upon confirmation of payment. Implemented full dark/light theme support and bilingual localization in English and Georgian.

2025 Dec. – Present
ROWIX

### Front-End Developer (Full-time)

Developing and maintaining interactive front-end interfaces for ROWIX using React, TypeScript, and Next.js. Built reusable component systems, integrated external libraries, and implemented responsive, animation-rich UI. Collaborated within a team to deliver scalable features while ensuring performance, maintainability, and smooth user experience.

## Education

### Georgian-American University

Bachelor of CS and Engineering

2022 - Present (2026 Graduation)

### LeverX

Front-End Development Course

Nov 2024 - Dec 2024

2024 - Present
GarGari

### Co-Founder & Front-End Developer

Co-founded GarGari and led front-end development across company projects, building responsive interfaces, implementing modern UI/UX patterns, and optimizing performance.

2024 - 2025
Zmna.ge

### Front-End Developer

Developed the full front-end of Zmna.ge, a modern Georgian news platform. Built responsive UI, implemented dynamic category pages, optimized rendering, integrated ads, and maintained overall site performance and user experience.

2023 - Present
Freelance

### Front-End Developer

Developed modern web applications and websites for clients using React, Next.js, and responsive UI design. Built production websites including **Reagent.ge**, implementing responsive layouts, reusable components, and performance-optimized pages.
